

I. Introduction & Scope

This report covers daily operational checks, including physical security, policy compliance, and inventory controls for the project infrastructure.

II. Discussion of Findings

- **System Reliability:** Uptime maintained at 99.9% for the current period.
- **Security Audit:** Pass. All users are now utilizing MFA as per the updated Company Policy.
- **Housekeeping:** Temporary files and old Docker images cleared to save 40GB of storage.

III. Performance Trends

Visual representation of daily throughput and error rates. Observations show a steady decline in "File Not Found" errors since fixing the VS Code Explorer path issues.

IV. Conclusions & Recommendations

- **Conclusion:** Operations are stable but reaching capacity limits.
- **Recommendation:** Move to a tiered storage system to optimize costs.
